# FOLLOW-UP

- Future testing will not include percentages by gender. The random selection process should account for any discrepancy in gender distribution.
- Principals and Athletic Directors unanimously agreed to keep the scope of the testing as currently designed
  - Initial intent of testing included a student safety/performance component
  - Widened scope would radically alter deterrence as the pool of students increases without an associated increase in the number of tests
- Key West High School maintains that the difference in roster size was an record keeping issue and not one related to testing.
- Testing percentages for 2019-2020 will be 10% - 15% depending on roster size due to personnel constraints.
